

'C' Type Demagnetizer

Demagnetizer is required to eliminate Residual Magnetism of work piece, which is generated due to manufacturing process like turning milling grinding operations and due to contact with magnet also. Sizes and models are varying as per requirement. Magnetism can be verified by GAUSS METER.

This particular model is for on line conveyor system.

How to operate

- a) Provide suitable supply to demagnetizer
- b) Operate on PLC
- c) The work piece is require to kept on surface and move it from one end to another end.

How to check performance

Check residual magnetism of work piece by Residual Field meter (Gauss Meter)

- a) BEFORE demagnetizing.
- b) Demagnetizing it as per above instruction
- c) Check residual magnetism of work piece by Residual Field meter (Gauss Meter)AFTER demagnetizing

Available Sizes

Code No.	Size (LxWxH)
023-05-01	150 x 100 x 100 mm
