

Tunnel Type Demagnetizer Round Shape

Application

Demagnetizer is required to eliminate Residual Magnetism of work piece, which is generated due to manufacturing process like turning milling grinding operations and due to contact with magnet also. Sizes and models are varying as per requirement. Magnetism can be verified by GAUSS METER.

How to operate

- Provide suitable supply to demagnetizer
- Operate by foot switch & also operate by PLC
- The work piece is passing/ moves from tunnel.

How to check performance

- Check residual magnetism of work piece BEFORE demagnetizing.
- Demagnetizing it as per above instruction
- Check residual magnetism of work piece by Residual Field meter (Gauss Meter) AFTER demagnetizing

Area of application

Tool Room and standard Room, Press Shop, Assembly line etc.

Advantages

Increase tool life. Increase productivity. Increase quality.

Tunnel Type Demagnetizer Round Shape

Available Sizes

Code No.	Size (Dia.xLength)
023-02-01	Dia 100 x 150 mm
023-02-02	Dia 150 x 150 mm
023-02-03	Dia 200 x 150 mm
023-02-04	Dia 300 x 150 mm
